

## Laboratory Safety Series

- Videotape/DVD Programs
- Interactive CD-ROM Courses
- Online, Web-Based Courses

"There's not enough money in my budget for safety training!" . . . "I just don't have the time to hold these training meetings!" . . . "It's almost impossible to get everyone together all at once without disrupting the work that they are doing!" . . . These are just some of the training problems that lab managers face today. Yet now, more than ever, safety training is essential for laboratory employees. Unfortunately, there never seems to be enough of anything. . . time, money or good training materials. . . to get the job done right.

MARCOM's Laboratory Safety Series can help. Available on videotape, DVD, as Interactive CD-ROM courses and online, these programs address the safety issues that are unique to laboratory environments.

### VIDEOTAPE/DVD PROGRAMS

\$149.00

This series of 12 Videotape/DVD programs was created to provide laboratory employees with the specific training that they need to do their jobs safely. Filmed in real working laboratories, a number of different types of laboratory environments are shown, so that every employee will relate to what they are seeing. Each program is 10-15 minutes long and deals with a different subject.

The programs come packaged in three-ring binders which also contain a Presenter's Guide as well as reproducible Employee Quizzes, Scheduling and Attendance Forms and Training Certificates. These Videotapes/DVDs are ideal for monthly safety meetings, new employee orientation programs or "refresher" training for experienced employees. Topics in the series include:

- Orientation to Laboratory Safety
- Safety Showers & Eye Washes
- Flammables and Explosives
- The OSHA Formaldehyde Standard
- Electrical Safety in the Laboratory
- Laboratory Ergonomics
- Material Safety Data Sheets
- Laboratory Hoods
- Preventing Contamination
- Safe Handling of Laboratory Glassware
- Planning for Laboratory Emergencies
- Handling Compressed Gas Cylinders

### INTERACTIVE CD-ROM AND ONLINE COURSES

\$495.00

Using a powerful combination of audio, full-motion video, text and colorful graphics, these CD-ROM and online courses provide the most cost-effective laboratory safety training available today. Based on the acclaimed "Laboratory Safety Series", the courses are divided into a number of logical sections, each with its own quiz, so the information is easily understood and retained.

The CD-ROM versions of the courses are Windows compatible and include platform software that installs automatically. Each course comes with comprehensive Trainers and Users Guides. The online versions of the courses are available through MARCOM's online training center.

Also designed with the Training Manager in mind, both the CD-ROM and online versions of the courses include a comprehensive learning management system (LMS), at no additional cost. Using these systems trainers can define and set up curriculum... establish log-in procedures... even set up "pre" and "post" tests. Employee performance information can be collected and organized through powerful relational databases, which generate a number of recordkeeping and tracking reports. These databases also include features which will allow you to import this information into many of today's common personnel databases. Topics in the CD-ROM series include:

- Orientation to Laboratory Safety
- Safety Showers & Eye Washes
- Flammables and Explosives
- The OSHA Formaldehyde Standard
- Electrical Safety in the Laboratory
- Laboratory Ergonomics
- Material Safety Data Sheets
- Laboratory Hoods
- Preventing Contamination
- Safe Handling of Laboratory Glassware
- Planning for Laboratory Emergencies
- Handling Compressed Gas Cylinders
